

Activated Charcoal Powder

Charcoal is essentially pure carbon, and the terms “activated carbon” and “activated charcoal” are used interchangeably.

While coal comes from plant matter that loses its noncarbon components over a long time because of pressure and heat deep in the earth, charcoal is made quickly, by heating wood in the absence of oxygen. This leads to a charring (without burning the carbon into carbon dioxide), which drives off most everything except carbon. The process is done on a scale of hours, rather than the millions of years for coal.

If you take a peek inside your medicine cabinet, no matter how full it may be, you'll likely be hard pressed to find one treatment that works for dozens of medical conditions and first aid emergencies. There is a natural remedy, however, that is so safe and effective it is recommended for dozens of ailments, including bee stings, scorpion bites, pink eye, and acid reflux. It's called [activated charcoal](#) powder, and it's one of nature's best antidotes.

[activatedcarbonactivatedcharcoal.com](#) is the Internet's number-one resource for information on activated charcoal powder. Here, you'll find a wealth of information on the many uses and benefits of activated charcoal powder, inspiring testimonials, and a secure storefront where you can purchase all of the activated charcoal products you need.

Activated Charcoal Powder: The Recommended Choice Unlike the many "magic cures" that can be found on the Internet today, activated charcoal powder is recommended by the Poison Control Center of America, and it is rated Category 1, "Safe & Effective," by the FDA. In fact, it's used in hospitals every day for accidental poisoning and to detoxify patients who are suffering from an overdose of aspirin, barbiturates, morphine, and other addictive drugs. There is no other treatment that works as well.
