

Activated Coconut Charcoal

Charcoal is essentially pure carbon, and the terms “activated carbon” and “activated charcoal” are used interchangeably.

While coal comes from plant matter that loses its noncarbon components over a long time because of pressure and heat deep in the earth, charcoal is made quickly, by heating wood in the absence of oxygen. This leads to a charring (without burning the carbon into carbon dioxide), which drives off most everything except carbon. The process is done on a scale of hours, rather than the millions of years for coal.

Many people are surprised to learn that charcoal isn't made exclusively from wood. In fact, charcoal can be made from a wide variety of products including coconut shells, peat, bone char, and sawdust. Here at activatedcarbonactivatedcharcoal.com, many of the activated charcoal products that we sell are made from coconut shell - a material that produces a high-quality and extremely adsorbent charcoal without damaging the environment.

The standards for "food-grade" [activated charcoals](#) are very stringent compared to other charcoals. Food-grade charcoals are designed to be ingested, or are used in blood filtering devices such as liver and kidney dialysis units. All of our USP food-grade, activated charcoals are made from 100% natural products such as hardwoods, coconut shells, and bamboo. This ensures that you get to enjoy all the wonderful health benefits without worry of artificial additives or preservatives.

Activated Coconut Charcoal – USP Food Grade

Here at activatedcarbonactivatedcharcoal.com, we take great pride in the information and the products that we offer each customer who visits our site. If you have any questions about how activated charcoal is made from coconut or how it can benefit your life, please contact us. We'll take the time to listen to your concerns and answer your questions honestly and as thoroughly as possible.

A great way to learn more about the [activated charcoal](#) that we sell is to read the stories from our customers. Each of these men and women has a different story to tell about how activated charcoal has positively changed their lives. From painful ear infections to dreaded brown recluse spider bites, the testimonials you read will amaze you. They may even motivate you to try activated charcoal for yourself!
